Quantity Surveying and Cost Management Capability...

SC Quantity Surveyors provides a comprehensive and competitive range of Quantity Surveying and Cost Management services for projects of all types and values.

We are a customer driven organisation and our primary focus is to provide an expert, reliable and personal service to ensure our clients obtain the best value for their money as they make a construction investment.

Delivering Value...

At SC Quantity Surveyors, we use our expertise and experience to deliver practical solutions and delivering real value to our clients. We seek to utilise our practical experience, commercial and cost management skills for the benefit of our clients.

As professional quantity surveyors & construction cost consultants our primary goal is to achieve total client satisfaction by providing high quality, cost effective services that fully meet our clients' objectives.

We have an excellent record of controlling budgets, advising on value for money, meeting tight deadlines and providing a properly resourced service.

Delivering complete value for money for our clients is not just about cutting costs, it also includes saving time, reducing risk and minimising disruption.

Cost, Time & Quality...

The company's ethos of delivering projects on Time, to Cost and with high Quality has helped us to achieve optimum results in delivering projects to our clients.

We are committed to satisfying the client's objectives and requirements and actively strive to improve our core services. We are flexible and able to adapt to the continuously changing construction market and we pride ourselves in assisting our clients to accomplish their goals and have their projects completed on time and within budget.

Working alongside architects, designers, engineers, contractors & sub-contractors we are best suited and able to monitor and control construction costs closely and advise you accordingly.

Our Quantity Surveying and Cost Management services will ensure you obtain value for money, through rigorous and predictable cost, time and risk control.
